PROFESSIONAL SUMMARY

Senior Backend Software Engineer with 8 years of experience building and operating large-scale distributed systems for one of Indonesia's largest e-commerce platforms. Strong expertise in Go, JavaScript, MySQL, PostgreSQL, Redis, microservices, APIs, system integration, and production operations. Proven track record of owning end-to-end projects, delivering high-volume backend systems, and operating production services at Tokopedia (ByteDance Global E-Commerce), across Resolution Center (Aftersales) and Digital Goods.

CORE SKILLS

Programming Languages: Go, JavaScript, PHP, ABAP
Frameworks: Plain/Native, Gin, Echo, Laravel, SAPUI5, NuxtJS
Databases: PostgreSQL, MySQL, Redis, Memcache, Elasticsearch, MongoDB, Firebase
Backend & API: REST, gRPC, GraphQL, NSQ, Cron
Enterprise: SAP ABAP, SAP Fiori, SAP Cloud Platform, SAP CPI
Devops & Infra: Linux, Nginx, New Relic, Docker, GCP, AWS S3, MinIO
Languages: Bahasa Indonesia, English

WORK EXPERIENCE

Tokopedia Yogyakarta, Indonesia
Indonesia's leading e-commerce platform, now part of ByteDance Group, serving 100M+ monthly active users and 9.7M+ merchants.
Senior Software Engineer Jan 2026 - Present

- Promoted to Senior level in January 2026 through ByteDance's formal promotion review process, reviewed by global engineering leaders outside my direct organization.
- Owned the end-to-end delivery and coordinated cross-team of Change of Mind, Free Return Seller Fault, and Authenticity Guaranteed initiatives that increased customer satisfaction by 0.75%.
- Led the end-to-end delivery of the Return Shipping Option Revamp, from TRD to production, increasing payment penetration by 0.19% and reducing TAT(Turn Around Time) by 4.0%.
- Drove a database migration of 43 tables with zero downtime and zero regression bugs, improving maintainability and reducing complexity while protecting 50% of Tokopedia's GMV from data loss.

Software Engineer Jan 2022 - Dec 2025

- Owned backend services for Resolution Center, a complaint system for buyers, sellers, and customer service to resolve product-related issues.
- Designed and implemented product development by creating technical plans and implementing new features to improve the resolution process.
- Optimized system performance by improving queries, refining code logic, and enhancing overall efficiency.
- Conducted debugging and system monitoring to ensure reliability, stability, and fast issue resolution.
- Designed and implemented API integration and unit tests, maintaining a minimum 98% coverage across all developed endpoints.
- Led a data synchronization system to sync millions of row historical transaction data from Tokopedia to TikTok Shop as part of the integration.
- Developed a fraud prevention system, based on historical data with potential savings of around IDR 100 million per month.
- Automated administrative processes, significantly reducing support call volume and improving operational efficiency over a six-month period.
- Developed a Unified Customer Satisfaction system that drove a ~10% increase in customer satisfaction over the first half of 2024.

Soltius Indonesia Jakarta, Indonesia
Indonesian IT solutions provider and SAP partner, delivering digital transformation solutions for enterprises.
Technical Consultant (Analyst → Associate) Oct 2017 - Dec 2021

- Researched and worked on SAP Cloud Platform features.
- Built RESTful APIs based on Atom and OData for data integration.
- Developed programs using ABAP for backend business logic.
- Configured migration and integration between SAP HCM and SuccessFactors Employee Central using SAP Cloud Platform Integration.
- Created technical documentation for development and integration processes.
- Conducted SAPUI5 training sessions, teaching Fiori app development to clients.
- Assisted in analyzing integration processes for warehouse tracking applications.
- Developed SAPUI5 applications for student report management as part of the ABAP and Fiori team.

Campina Ice Cream Surabaya, Indonesia

Indonesian ice cream manufacturer.

Intern Jun 2014 - Jul 2014

- Developed a warehouse inventory system using PHP to track and manage repair requests for items.
- Improved efficiency in recording and monitoring repair-related inventory.

ACHIEVEMENTS

- **TikTok Shop Spot Award Q4 2025 (2026) –** Recognition as an internal engineering team for outstanding project contributions.
- **TikTok Shop Spot Award Q4 2024 (20265) –** Recognition as an internal engineering team for outstanding project contributions.

EDUCATION

University of Brawijaya Malang, Indonesia

Bachelor of Computer Science (Informatics Engineering) — GPA 3.29/4.00 Aug 2011 - Aug 2016

VOLUNTEERING

Tarbiyah Sunnah Learning Remote

Backend Engineer Oct 2020 - Dec 2021

Developed a CMS REST API using Go with Clean Architecture, implementing lecture schedules, lecture locations, articles, and a file upload service integrated with DigitalOcean Cloud Storage. Built with Go, MySQL, and AWS SDK for a scalable and efficient system.
